

# HandyPitcher™

HandyPitcher is a unique handle that attaches to soda bottles, milk cartons or similar containers to turn them into an easy-to-use pitcher.

While the HandyPitcher is easy to use by anyone, it is especially great for children, seniors or anyone with a physical disability to easily and safely pour liquids from 2 or 3 liter plastic bottles, glass bottles or even square 1 liter milk cartons.

With the HandyPitcher you can hold the glass or cup with one hand and safely hold and pour the liquid from the bottle with the other hand.

No more messy spills or bottles slipping through your fingers.  
HandyPitcher will change how you pour drinks from heavy and bulky bottles.
